

## actiNAS XL 2U-12

Compact & Powerful Disk-based NAS- & Backup System  
Based on Server Components, IPMI 2.0,  
dual 10GbE SFP+, dual 1GbE RJ45 Interfaces

Network Attached Storage systems (NAS) are mostly part of any IT environment. For small and medium-sized companies that need a reliable NAS storage system to store their files centrally, the actiNAS XL 2U-12 is the right choice. Up to twelve enterprise-class SATA-III hard drives can be flexibly configured, providing a capacity of more than 100 terabytes usable by customer. Among other things, access to existing LANs will be realized via dual optical 10Gb-Ethernet and dual 1Gb-Ethernet RJ45 interfaces. The management of the actiNAS XL 2U-12 will be done via an intuitive web-GUI as well as using the separate interface with IPMI 2.0.

### Product-Highlights

- Compact 2U Rackmount-Chassis
- Server Motherboard, 4Core Server-CPU, DDR4 ECC reg. RAM
- IPMI 2.0 Redfish via 1GbE RJ45
- Dual, redundant Power Supply
- Linux-based integrated NAS Operation System
- 12bay-RAID-System for up to 12x SATA-III HDDs / SSDs
- Management via LCD-Panel, web-GUI, or SSH & Telnet
- 4x LAN Interfaces  
dual 10GbE SFP+, dual 1GbE RJ45
- Support of SMB (CIFS), AFP, NFS and iSCSI-Support, Volume-Cloning, Replication, DHCP, ADS, SNMP, und VAAI Support for iSCSI/NFS etc.
- 36 Months limited Warranty incl. Advance Replacement of defective Parts (Fast Exchange Service)
- CF-Configurations (CareFree) incl. 24x7 Enterprise SATA-III HDDs / SSDs

### Data, Data, Data ... and Backup Sets as well

The actiNAS XL 2U-12 storage system is ideal as centralized storage within an existing IT infrastructure. RAID-managed Hard Disk Drives (HDD) or Solid State Disks (SSD) provide low-cost storage for an easy storing of data. Alternatively, the backup sets of a disk-based backup can be stored and kept ready. Installed in a separate fire section the backup sets keep available in case of a disaster. If desired, it is also possible to replicate the data to a second actiNAS XL 2U-12.

### Reliable through proven Server Components

Equipped with components out of the server class, original Intel server CPU, embedded server motherboard with DDR4-ECC-RAM, dual redundant power supply, and server management port via a separate IPMI 2.0 interface, the actiNAS XL 2U-12 is especially prepared for use within system environments as a separate backup or data storage system with access for authorized users. Two (dual) optical LAN interfaces 10GbE SFP+ as well as dual 1GbE RJ45 are available for connection to the existing LAN.

### 36 Months Service and Support inclusive

actiCare service includes a 36-month limited system's warranty including the proven Fast Exchange Service (Advance Replacement of defective Parts) as well as a free technical support via telephone, e-mail, and internet in English. On request, actiCare service extensions are possible up to 60 months.

Compact Disk-based NAS- & Backup-System - Applications

**Centralized Storage System**  
 1. Storing of User Data (Files)  
 2. Target/Storing of Backup Sets

## actiNAS XL 2U-12 as centralized Storage

Especially in small businesses, small workgroups or branches, the actiNAS XL 2U-12 is optimal used as a central NAS storage (NAS = Network Attached Storage). Users simply access the system from their workstations via an 1 Gb- or 10 Gb-Ethernet infrastructure. The actiNAS XL 2U-12 is easily managed via a user-friendly web GUI. Here, among other things, the settings for the RAID engine, RAID levels with or without hot spare HDD/SSD can be set. Similarly, the status of the server hardware may be also be monitored remotely via the separate IPMI 2.0 RJ45 interface as part of a managed service agreement. This significantly reduces on-site maintenance work.

## actiNAS XL 2U-12 for storing Backup Sets

Installed in a separate fire section and connected via dual optical 10GbE SFP+ as well as dual RJ 45 1Gb-Ethernet interfaces, the actiNAS XL 2U-12 is an ideal backup target for enterprise-wide backup software. Databases, virtual environments, and applications are possible to be backed up executing a backup-to-disk (B2D) backup strategy using leading Backup Software.

**Backup-to-Disk**

Function Overview NAS System:

(Extract)

<b>System Management</b>	Web-GUI, SSH, telnet, Unicode-Support, Setup-Wizard, SNMP, IPMI 2.0 Redfish
<b>Storage Management</b>	EXT3/EXT4/NTFS-Volume-Management, iSCSI, VAAI-Support
<b>Storage Operating System</b>	RAID 0, 1, 5, 10, 50, 60 incl. hot-spare, Online Capacity Extension Error Management, Statistics
<b>Networking</b>	Active Directory Support (ADS), MS Domain Controller (PDC), DHCP Server/Client, WINS-Server, web-Server, NIC-fail-over
<b>Protocols</b>	TCP/IP, SMB(CIFS), NFSv3, NFSv4, AFP, ftp, sftp, http, https
<b>Backup Function</b>	Volume-Cloning, Data-Copy, scheduled Backup (full, incremental), rsync
<b>Supported Operating Systems</b>	Windows 7/8.1/10, Windows Server 2016/2019, Linux/Unix, MacOS

## Compact Disk-based NAS- & Backup-System – Technical Data

<b>Product Type</b>	actiNAS XL 2U-12
<b>Description</b>	Compact Disk-based NAS- & Backup System as 2U Rackmount with 12x HDD/SSD Drive-Carrier
<b>Application</b>	Storage System for 1GbE and 10Gb Ethernet Infrastructures i.e. as NAS- or Backup System for Servers / Clients
<b>Storage Operation System</b>	Linux-based NAS-System with integrated RAID Functionality as well as ADS/NIS- and DHCP-Support incl. internal Backup- and Restore Functions
<b>NAS Funktion</b>	i.e. File-Server, Shares with Support for SMB (CIFS), NFS, AFP (Apple-Talk), iSCSI Target Volumes, ftp-, and sftp-Server
<b>Backup Funktion</b>	Scheduled Backup / Restore, Data Replication Volume Cloning, Data Copy and –Synchronization
<b>Chassis / Scope</b>	Robust Metal Chassis in 2U Form Factor incl. Rail Kit 12bay SATA-III HDD/SSD hot-swap Drive Carrier (lockable) as well as a LCD-Panel at the front Side
<b>Processor / Motherboard</b>	Server-CPU Intel Xeon D-1518, 2,2GHz, 4 Kerne, Server-Motherboard (IoT embedded)
<b>Memory (RAM)</b>	Default: 8GB DDR4 ECC reg. Upgrade up to: 128GB DDR4 ECC reg.
<b>No. of HDDs/SSDs</b>	Up to 12x SATA-III
<b>Configuration</b>	Without HDDs/SSD or as CF Configuration (CareFree) with Enterprise SATA-III HDDs (Specification: 550TB/anno) 2TB / 4TB / 8TB / 10TB / 12TB / 14TB / 16TB / 18TB
<b>RAID Management</b>	Fault tolerant RAID-Engine with RAID-Level 0, 1, 5, 6, 10, 50, 60 incl. Hot-Spare, Online Capacity Extension, Volume-Management, and Disk Statistics
<b>LAN Interfaces (Ethernet)</b>	4x LAN: 2x (dual) 10 GbE SFP+ and 2x (dual) GbE RJ45
<b>System Management</b>	Access Operating System: via Web-GUI, SSH, Telnet Access Hardware-Management: via IPMI 2.0 Redfish, SNMP
<b>System Interfaces</b>	Rear Side: 2x USB 3.0, 1x VGA 1x separate GbE RJ45 (IPMI 2.0)
<b>Extension</b>	Yes, Capacity Extension with additional HDDs/SSDs in free Drive Carriers
<b>Power</b>	Dual PSU: 110-240V (Full Range), 50-60Hz, max. 400W, 80PLUS Standard Idle: ca. 45W, Operation: ca. 110W Air Stream under Operation: ca. 375Btu/h – ca. 395KJ/h
<b>Environment</b>	10-35 Degree Celsius 10-85% Humidity – not condensing
<b>Dimension Weight</b>	88 mm x 482 mm x 500mm (HxWxD) ca. 13,0 kg w/o HDDs/SSDs / ca. 16,6 kg incl. 12x HDDs
<b>Limited Warranty</b>	36 Months (3 Years) Incl. Fast Exchange Service (FESc) – Advance Replacement of defective Parts Incl. E-Mail/Internet Support & Telephone-Hotline
<b>Service Option</b>	Up to 60 Months (5 Years) Incl. Fast Exchange Service (FESc) – Advance Replacement of defective Parts
<b>Certification</b>	CE, TÜV-Safety, RoHS
