EUROstor high performance storage system receives Open-E certification

Open-E benchmarks and certifies EUROstor ES-8724DJDSS25 for Open-E JovianDSS software-defined storage

Atlanta, Georgia; August 13, 2015: – Open-E, a leading developer of innovative data storage software used for building and managing centralized storage servers, and EUROstor, a European storage manufacturer, announced today the availability of the EUROstor ES-8724DJDSS25 based on Open-E JovianDSS software-defined storage – a high performance storage system that consists of EUROstor hardware and Open-E software.

With the ES-8724DJDSS25 it is possible to build a fully redundant and fault-tolerant solution with features that are effortlessly accessible thanks to the intuitive browser-based interface of Open-E JovianDSS. The biggest advantages are CPU-friendly high compression ratio, NFS performance of 4GB/s and big RAM Cache of 128GB. What is more, ES-8724DJDSS25 has high I/O from its 12Gbit backplane connected to a 12Gbit SAS HBA and 12Gbit drives, and can be easily upgraded with an additional processor. Another important feature is the ES-8724DJDSS25 RAM Cache performance which is increased by approximately 10-20% with DDR4-2133, compared to DDR3. Additionally, EUROstor uses one single Quad Core CPU, with 3,5GHz and 128GB RAM with 2133 MHz for best compression and deduplication results. The server can be expanded with another CPU up to 1TB memory.

EUROstor ES-8724DJDSS25 is optimized for databases and file servers as well as for virtualization tasks and allows for integration with VMware, Citrix and Microsoft Hyper-V environments. The server is recommend especially for VDI, databases, media streaming / CCTV, high RAM cloud servers or Exchange / SQL servers. Being based on Open-E JovianDSS, the system provides a multitude of advantages:

- Guaranteed data protection
- Data compression and in-line data deduplication
- Enhanced storage performance
- Flexible scalability
- Simplified management
- Data integrity check
- Unlimited number of snapshots and clones
- Tiered RAM and SSD Cache

Krzysztof Franek, CEO and president of Open-E confirms: „Since the very beginning of our business, we believed in the power of cooperation and mutual support. That is why our storage professionals work on certifications to provide customers with proven storage solutions. Our longstanding Gold Partner EUROstor provides professional support with Open-E JovianDSS Certified Engineers who have been working with the combination of

EUROstor hardware and Open-E software for many years. This way, customers are supported on every step of the way: from deployment to daily business. Now, with Open-E JovianDSS on the EUROstor ES-8724DJDSS25 they benefit from the huge advantage of being able to build software-defined storage on Enterprise level."

About EUROstor

EUROstor is a European storage manufacturer located in Filderstadt, Germany (near Stuttgart). President of EUROstor is Franz Bochtler. We develop, manufacture and sell high quality storage systems to the European market, designed for professional use and according to the specific needs of large and medium enterprises, research centers and universities. Find more information on http://www.eurostor.com/en/home.html

About Open-E

Open-E is a well-established developer of IP-based storage management software. Open-E JovianDSS, Open-E DSS V7 are robust, award-winning enterprise storage applications which offer excellent compatibility with industry standards, and are the easiest to use and manage. Additionally, they are some of the most stable solutions on the market and undisputed price performance leaders.

Open-E accounts for over 27,000 installations world-wide and has received numerous industry awards and recognition. Thanks to its reputation, experience and business reliability, Open-E has become the technology partner of choice for industry-leading IT companies such as Citrix, Intel®, LSI, VMware, and Adaptec.
